## Space Biosphere Ventures Special Plan

Client	Location	Area	Date	Services
Space Biosphere Ventures	Pinal County	3,600 Acres	1992	Master Planning Entitlements

The Planning Center prepared the Space Biospheres Venture Special Plan for this world class eco-destination for visitors, educators and the scientific community. This plan was designed to guide the development of an integrated environmentally-sensitive master planned community on 3,600 acres of land with a focus on the Biosphere 2 complex, a miniature model of the Earth's biosphere, created by enclosing seven tropical ecosystems within a three-acre airtight structure. All development within the area must address an analysis of the needs and requirements of the Biosphere 2 project. The plan is divided into two separate sections, and serves as a framework for the creation of a mix of living environments, support services, educational centers, adequate circulation and recreational needs/amenities for the Biosphere 2 community.
