At The Planning Center, our Community and Regional Planning Division specializes in providing sustainable planning services to municipalities throughout the Southwest. With the creation of the Comprehensive, Systematic and Inclusive Planning Model, our staff has developed a system that fosters community interaction, encourages livable communities, and responds to the surrounding environment.

The Planning Center seeks to strengthen and preserve the community's sense of place and character while responding to regional needs. Our staff utilizes the most cutting edge planning ideas and philosophies to create place-specific solutions that guide a community towards a sustainable future.
