Client	Location	Area	Date	Services
Diamond Ventures	Marana, Arizona	2.5 Miles	1999-2002	NPPO Landscape and Irrigation Plans Streetscape Design Signage Monumentation Construction Observation

The Planning Center staff was responsible for the design of more than 2 miles of landscaping along public roadsides and medians, as well as entry ways. The roads were designed with multiple species of palo verde for continuous spring bloom. A water-conscious natural resource. The Planning Center provided construction observation services during installation of the landscape and irrigation system. "As-Built" services were provided following project completion. Extensive salvaging and transplanting of native vegetation on-site helped to quickly create a mature and environmentally friendly streetscape solution.
